Sign up now to fast charge your electric vehicle

Pricing to be introduced for ESB fast chargers from the 18th of November 2019

Dear EV Driver,

As part of an overall €20m investment programme to support Ireland's growing demand for electric vehicles, ESB ecars announced the introduction of pricing on a phased basis for the public electric vehicle charging network in Ireland starting with fast chargers (43kW-50kW) from the 18th of November.

Drivers can now sign up via www.esb.ie/ecars.

What are the price plan options?

There are two price plans: **Pay As You Go (PAYG)** or **Membership**, payable by most credit or debit cards.

PAYG is 33c/kWh with various options such as prepay, auto top up or pay via an anonymous one time credit/debit card payment. Membership is recommended for people who use the network frequently. It is 29c/kWh with a €5 monthly subscription.

An **Introductory Offer** is available if you sign up before **30th November 2019** which offers Membership per kWh rates with no monthly subscription for 12 months.

As part of the upgrade a new ecar connect app will be available soon.

By logging into your account via the website or via the ecar connect app, the new functionality allows the ability to swipe to start or stop a charge. It shows the real-time availability of the charge point network on an integrated interactive map, you can track your usage, view your charge history, manage your account and order a new card.

Please note that when you sign up you will receive a confirmation email. If you do not receive it please check your spam folder.

For more information and to sign up please visit www.esb.ie/ecars.
