ESB Metro Express

The new ESB Metro Express is an exclusive high capacity Dark Fibre route in Dublin. In conjunction with the T50, the ESB Metro Express will create a perfect fibre ring offering customers a superior network, increasing protection and security serving the Datacentres in Dublin.

Why link up to the new ESB Metro Express?

It can increase your customer's availability from 99.99% to 99.999%, making this route an essential addition to your network if you have a presence in any Datacentre in Dublin.

- Independent to all other fibre networks in Dublin
- ESB Metro Express will provide diversity for co-location Datacentres and their customers within Dublin
- Flexible commercial options
- Proven track record in network building, management and maintenance
- Unrivalled SLAs that work for you

What gives our new Express route the edge?

The ESB Metro Express is a unique route, offering high capacity dark fibre covering 35km buried deep below ground.
