

Towers Portfolio

When operators need communication coverage and transmission solutions, the ESB Telecoms Ltd team is on hand to help.

We have a portfolio of towers spread nationwide, delivering flexibility of location and a future-proofed service for mobile and wireless communications operators alike.

Our service is innovative, and always in expansion mode. Right now we're proceeding with fibre enablement to an additional 250 sites. We understand how important coverage is to our clients, so we constantly demand the best from ourselves on their behalf.

How can we work for you?

At ESB Telecoms Ltd we believe in working in collaboration with our customers. We'll assemble a dedicated team to oversee your complete site requirements, from design and construction to operational assistance.

We're flexible, experienced and fast on the ground. Your project becomes our project and our network becomes your network which is fully owned and operated by ESB Telecoms Ltd. Yet the benefits of partnering go far beyond the set-up stages.

- A choice of sites that suit your needs best
- Site management, maintenance and structural analysis
- Quick turnaround on site accommodation
- Flexible commercial options
- Suitable site access arrangements
- An excellent safety record, with OHSAS 18001:2007 accreditation

A Towers Portfolio that strives to reach higher?

At ESB Telecoms Ltd we don't take shortcuts. We've worked diligently and consistently to achieve our safety record, and we never take it for granted.

We also offer a very broad range of strategic locations, and we go to great lengths to preserve site surroundings and aesthetics. We'll give you structure options that are in line with any given site's requirements. These include pylon, five lamp and lattice structures, as well as bird cage and tree-type towers.
