

Managed Bandwidth

High capacity connectivity solutions are a must for competitive operators. Your telecoms must be more than reliable and consistently deliver time and time again.

At ESB Telecoms Ltd we give you complete connectivity, everywhere. Operators benefit from managed bandwidth that's fully integrated with Metropolitan Area Networks and plug's directly into ESB's extensive nationwide tower portfolio. If you're ready for business, we're with you.

Why do business with us?

We use next generation managed bandwidth platforms with our advanced Optical and Ethernet equipment to ensure that customers receive the best performance from their network.

And when those needs change? We'll bring the flexibility that will allow your business to evolve with them.

- Performance-driven, advanced optical/ ethernet equipment
- Solutions carefully designed around your specific and evolving needs
- Ongoing investment to ensure a best-in-class network
- Flexible commercial offerings
- Proven track record in network building, operating and maintaining
- Unrivalled SLAs that work for you
- Delivers 2Mb to STM64; 10Mb to N x 10Gb

What gives our Managed Bandwidth the edge?

Our network provides the lowest latency available. It scales up when you need it to, in a way that remains affordable, and is based on a world-class technology platform.

The ESB Telecoms Ltd Network is Layer 1 and 2 enabled, and is Layer 3-ready. It delivers point to point (secure LAN), point to multipoint (WAN) and MAN connectivity.

Our Telecoms Operations Centre means service you can depend on, with the reassurance that we're there when you need us, 24 hours a day, every day of the year.
